

NIKSHITH NOOKA

AI/ML Developer — 8× Hackathon Winner — CGPA 9.49/10
📍 Hyderabad, India 📞 +91 8309065513 ✉ nikshithnooka@gmail.com
🌐 LinkedIn 🐙 GitHub

Professional Summary

AI/ML Developer, 8× Hackathon Winner, and Computer Science undergraduate with a CGPA of 9.49/10, combining strong academic performance with hands-on industry experience through four internships completed alongside full-time B.Tech studies. Experienced in Machine Learning, Computer Vision, NLP, Generative AI, and Full-Stack Development, having built and deployed scalable AI solutions using TensorFlow, OpenCV, LangChain, Gemini API, and Google Cloud Platform. Worked with structured and unstructured datasets up to 100GB, developed enterprise-scale RAG systems, and delivered multiple award-winning projects recognized at national and international hackathons.

Education

Malla Reddy University, Hyderabad Aug 2023 – May 2027
B.Tech in Computer Science Engineering (AI ML) **CGPA: 9.49/10**

Professional Experience

ML Intern — XYZON Technologies Feb 2026 – May 2026
Built a student performance prediction model on 1,500 records using Scikit-Learn and feature engineering techniques, improving predictive performance and enabling data-driven academic insights.

AI Developer — ViswamAI Aug 2025 – Oct 2025
Built and deployed an enterprise-scale Retrieval-Augmented Generation (RAG) pipeline over a 100GB dataset containing 80,000+ records for AI-powered knowledge retrieval and search applications.

Full Stack Developer Intern — Swecha (Open Source) Sep 2025 – Nov 2025
Developed a MERN-based healthcare platform managing 300+ patient records across 45+ operational sessions with scalable backend architecture.

AI Developer Intern — Kartavya Solutions Aug 2025 – Oct 2025
Developed NLP solutions using LangChain and integrated 5 AI models and APIs into a unified inference platform. Deployed models on GCP and designed modular architectures for production-ready AI systems.

Projects

Duality AI – Real-Time Object Detection
Developed a real-time object detection system using 7GB+ image data across 7 classes, achieving 88

VanRaksha – Forest Fire Risk Detection
Built a CNN-based fire risk prediction model using 5,000+ satellite images and weather parameters, achieving 85

GeoSick – Gemini Powered Global Health Analyzer
Developed a computer vision pipeline processing 1,000+ satellite images to analyze environmental and health risk indicators using AI-driven insights.

PetGuide AI – Self-Learning Recommendation Engine
Built an adaptive AI assistant covering 100+ animal species with continuous feedback-driven recommendation improvement and personalized suggestions.

Technical Skills

Languages: Python, JavaScript, C
AI/ML: Scikit-Learn, TensorFlow, OpenCV, CNNs, NLP, RAG, LangChain, Gemini API
Data Science: Pandas, NumPy, Feature Engineering, Model Training, Cross-Validation, Precision, Recall, F1 Score, AUC
Cloud APIs: GCP, AWS, REST APIs
Web Technologies: React.js, MERN Stack, MongoDB, MySQL, Firebase
Tools: Git, GitHub, Postman

Leadership

- Google Campus Ambassador
- Conducted AI Cloud Workshops
- Mentored 200+ Students
- Active Open Source Contributor

Achievements

- 8× Hackathon Winner across National and International Competitions
- 1st Prize – Paranox 2.0 National Level Hackathon, New Delhi
- 3rd Prize – HACK-A-THON 1.0 International Level Hackathon
- Winner – Darknetrix, Build With AI, Nav Nirman, Promptathon, Aignite, and Code Surfers

Certifications

- Microsoft Azure AI Fundamentals
- GenAI 101 – NSDC / GDG
- Shield of Appreciation – Academic Excellence
